THE PRODUCT

TCS Advance Epos system for all visitor attractions and leisure companies.

The TCS Advance Touch Screen Point of Sale system is a fully functional point of sale and loyalty tracking system. Utilising the same hardware as the ticketing or box office platforms, it's possible to run a complete but fully featured shop sales and product management system.

Any number of products can be managed by the system and at the shop front bar-coded products can be quickly scanned and processed for sale. If your products are not bar-coded, then it's also easy - using an integrated barcode label printer to produce your own barcode labels.

Stock level and purchase management functions are included, meaning it's possible to track minimum and maximum stock levels, and produce automatic purchase orders. Arrange of stock taking reports and functions also allow you to take the strain out of those back-breaking stock take days.

OUR ADVANTAGES

Our systems are designed completely in-house by our own software authors.

Direct access to our system designers is always possible. Often led by customer 'extra feature requests' new functions and facilities we think other customers may find useful are included in our standard software range.

KEY FEATURES

To finish off, the TCS Advance epos system also provides one of the keys to running a successful 'Loyalty' system by providing loyalty tracking per purchased products and allowing loyalty customers to redeem already awarded loyalty points against sales from any of the TCS Advance systems.

Of course like any of our systems, the point of sale system comes with a host of cashing up functions, reports and analysis and even comes with a client sales ledger and back order system.

An optional internet epos system provides everything you need to run a fully function web shopping site and is fully integrated with all your systems and provides full client loyalty functions.

TESTIMONIALS

"A great solution, we are immensely pleased the system provides just what we needed and required to speed up and provide the professional customer we were hoping for..."

Lora Smith

"Just what we were looking for, and so easy to use. A very professional system with many features we'd not even thought of. The training videos are brilliant..."

John Harris

"We're not sure how we ever managed without this system. We save so much time producing sales stats and management reports, and all at the click of a button..."

Jessica Priston
